## | PROFESSIONAL SUMMARY

I am a software developer with over five years of experience in front-end development, gradually expanding into full-stack applications. I specialize in building secure, high-performance web solutions and have worked with a variety of modern technologies and cloud platforms. My background in quality assurance gives me a strong eye for detail, ensuring reliability in everything I build.

## | WORK HISTORY

### Freelance - *Travel Gap*

Malta • 01/2024 - Current

- At the beginning of 2024, I moved from Argentina to Malta, hoping to explore Europe and further enhance my IT skills by immersing myself in the European workforce and working culture
- During this time I continued working freelance in both Malta and Argentina
- I have designed, developed, and enhanced websites for a diverse range of clients, including retail businesses, food outlets, law firms, and sports organizations

### Freelance - *Web Developer*

Remote • 10/2022 - 12/2023

- Developed dynamic and responsive web applications using Next.js, React.js, and Tailwind CSS, ensuring user-friendly interfaces.
- Translated Figma designs into pixel-perfect, responsive UIs using Tailwind CSS.
- Integrated front-end applications with CMS platforms such as Contentful and Strapi to enable dynamic content management.
- Designed and built custom WordPress websites, delivering tailored solutions for content management and e-commerce.
- Deployed web applications across various environments, including Vercel, Netlify, managed servers, and cloud providers like AWS EC2 and DigitalOcean.
- Managed deployments and infrastructure on AWS (EC2, S3) and optimized Linux-based servers for hosting scalable applications.
- Engineered a custom proxy server with Nginx to enhance

## | SKILLS

### Programming & Front-End Development

- TypeScript
- React.js
- HTML5 & CSS3
- Tailwind CSS

### Back-End & CMS Integration

- Node.js
- Strapi CMS
- Contentful CMS
- WordPress

### Version Control & Development Tools

- Git & GitHub
- Visual Studio Code
- Figma

### DevOps & Deployment

- CI/CD
- Docker (Containerization)
- AWS (EC2, S3)
- DigitalOcean
- Vercel & Netlify

### Software Development Practices

- Agile & Scrum Methodologies
- Software Testing & QA
- IT Resource Management
- Collaboration & Teamwork

### Project & Workflow Management

- JIRA
- ClickUp
- Notion
- Trello

## | EDUCATION

### Digital House

Buenos Aires • 12/2020

### Full-stack Web Development

performance and security.

- Integrated Docker for containerized development, improving consistency across environments.
- Optimized performance and ensured smooth CI/CD processes for fast and reliable deployments.

#### **Composable Finance - Quality Assurance Analyst**

Remote • 03/2022 - 09/2022

- Designed and executed automated and manual tests for web applications, ensuring high-quality releases
- Developed end-to-end test suites for 3 different DApps
- Collaborated closely with developers and product teams to identify and resolve bugs early in the development cycle
- Created a comprehensive project library containing documentation on similar projects, relevant blog posts, and other useful resources to streamline onboarding and knowledge sharing
- Provided detailed documentation and test reports to enhance transparency, maintain traceability, and support continuous improvement in the QA process
- Participated in code reviews and sprint planning
- Proactively identified and addressed bugs, contributing to a culture of continuous software improvement

#### **Scale I.A. - Quality Assurance Manual**

Remote • 11/2021 - 02/2022

- Reviewed and validated data extracted by a web scraper, ensuring accuracy, completeness, and adherence to predefined guidelines
- Identified inconsistencies, errors, and missing information, improving overall data integrity for AI training datasets
- Collaborated with data engineers and developers to refine data pipelines, optimizing extraction processes and minimizing errors
- Maintained and updated detailed documentation on data validation processes
- Worked closely with a team in an Agile environment, participating in sprint planning, stand-ups, and retrospectives
- Utilized Google Sheets and Kanban boards to track progress, manage tasks, and enforce data quality criteria efficiently

#### **Pagano S.A. - Technical Support Analyst**

Carlos Casares, Argentina • 01/2019 - 10/2021

- Provided technical support to staff, troubleshooting hardware and software issues to ensure smooth daily operations
- Maintained and repaired office computers, ensuring all systems functioned efficiently and minimizing downtime
- Assisted in onboarding new employees by setting up user accounts and training them on the company's management system
- Managed IT resources, including software and hardware procurement, to ensure all departments had the necessary tools
- Documented and maintained IT procedures, troubleshooting steps, and system configurations to streamline operations and future issue resolution
- Performed data entry tasks, ensuring accurate record-

**Universidad Nacional De La Plata**

La Plata • 12/2016

**Ingeniería en Computación:** Bachelor in  
Computer Science  
(incomplete)

keeping and contributing to organized information management

### Aero - Junior Web Developer

La Plata, Argentina • 04/2018 - 12/2018

- Maintained and enhanced web applications and internal tools using Ruby on Rails, React.js, HTML5, and CSS
- Implemented state management solutions with Redux, improving data flow and efficiency in React applications
- Worked as part of a large development team, improving collaboration, code review, and version control skills using Git
- Provided technical guidance to third-party organizations, assisting them in understanding and modifying our codebase effectively
- Contributed to Agile sprints by delivering front-end features, participating in sprint planning, daily stand-ups, and retrospectives

### Snappler - Junior Web Developer

La Plata, Argentina • 11/2017 - 04/2018

- Developed and maintained web applications and internal tools using Ruby on Rails
- Built responsive and interactive user interfaces with React.js, HTML5, and CSS
- Applied object-oriented programming (OOP) principles to write clean, maintainable, and scalable code
- Gained hands-on experience in frontend development, enhancing UI/UX with modern CSS techniques and best practices
- Collaborated with a client to translate their vision into a functional web application, refining communication and problem-solving skills
- Worked closely with senior developers, learning best practices for code structure, version control, and software development workflows
